

HX 10E: The strength in the electric lifting

The new series HX 10E, besides having characteristics such as the stability and the versatility typical of the previous series, also introduces a great reliability and practicality thanks to the innovative new frontal protection and the reduced weight. The truck allows electric lifting of weights to a height of 800mm, it creates a useful adjustable working platform suitable for places such as workshops. It can also be used to support other machines in production, picking and similar areas.

MODEL		HX 10E	HX 10E
CAPACITY	kg	1000	1000
ROLLERS	N°/*	2 / P	2 / P
WHEELS		G	G
DIMENSIONS			
FORK LENGTH	mm	1150	1150
FORK WIDTH	mm	540	680
HEIGHT FROM THE FLOOR	mm	85	85
WEIGHT	kg	141	148
BATTERY	V-Ah	12-60	12-60
CHARGER	V-A	12-10	12-10
MAX. LIFTING HEIGHT	mm	800	800

G=Rubber, P=Polyurethane

Painting

The unrefined base, after proper conditioning, is painted with a tough epoxy coating at 250°C. This gives a high quality finish, and awards greater resistance to daily wear-and-tear, and atmospheric damage.

Front protection

A new front protection with:

- smaller dimensions
- formed steel cover shielding wheels and the hydraulic unit
- protective top cover made in ABS shock resistant plastic shielding the battery
- redesigned and improved battery support

Forks control switch

A switch built into the handle allows easy lifting and lowering of the forks.

Forks

The rounded front forks make pallet entry and exit easy, as well as reducing wear and tear damage.

Adjustable working platform

At a height of over 400mm, the optional stabilisers make the HX 10E a very safe and steady working platform, preventing rocking and movement in all directions.

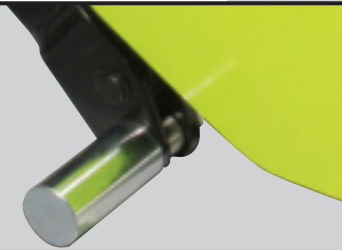

Handle

The increased distance between the handle and the machine ensures a greater level of comfort and safety for the operator when in use

Stabilizers

The optional stabilizers positioned at the rear improve its balance, making the work easier even when lifting and working with heavy loads.
